

**Appendix A.**  
**Cost-Feasible and Illustrative Project Lists**

## What lists are included in this Appendix?

There are two lists.

The first is a list of proposed projects and programs that can be completed between 2016 and 2040 with estimated federal transportation dollars. This list is sorted by horizon and the project ID number. There are three horizons including a short-term (2016-2020), mid-term (2021-2030), and long-term (2031-2040). The horizon indicates the time period in which funding will be available to complete the project.

The second list represents additional projects that have been identified as important priorities, but cannot be completed within the anticipated level of federal funding.

## What do the column headers mean?

**NEED ID:** A unique identification number assigned to each project or program that was evaluated for the Regional Transportation Plan (RTP). T

**RTP ID:** A unique identification number assigned to each project or program that was adopted into the fiscally-constrained portion of the RTP. The 7- or 8-digit number uses a numbering convention that offers basic information about each project. The first two digits refer to the last two numbers of the year in which the project was added to the RTP, the third digit refers to the county in which the project is located, the fourth number refers to the type of project. The next three digits are a sequential number which do not specific meaning other than to ensure that each RTP ID is unique. Some numbers have an 8<sup>th</sup> digit. That number refers to a specific phase among all projects that share the first 7 digits.

Location	Type of Project
1 Davidson	1 New Road
2 Maury	2 Widening
3 Robertson	3 New Interchange
4 Rutherford	4 Interchange/Intersection Improvement
5 Sumner	5 Transit Capital/Operating
6 Williamson	6 Bike/Ped/Greenway
7 Wilson	7 ITS/Signage/Wayfinding
8 Multi-County	8 Bridge
	9 Other
	10 Reconstruction/Rehabilitation/

**TIP ID or TDOT PIN:** A number used to track the project through its phases of development in the MPO's Transportation Improvement Program (TIP) or TDOT's tracking system (TDOT PIN).

**COUNTY:** The county or counties where the project is being proposed.

**LEAD AGENCY:** The jurisdiction or agency that is responsible for developing and implementing the proposed project. This is subject to change.

**PROJECT TYPE:** This indicates the type of work being proposed. An explanation of types is provided inside the back cover of this binder.

**PROJECT NAME:** A short description of the project location and proposed effort. The description is subject to change as the project proceeds through engineering and environmental assessment.

**MILES:** Estimated length of the project.

**HORIZON:** The time period in which funding is anticipated to be available to complete the project. **2020** = 2016-2020, **2030** = 2021-2030, **2040** = 2031 to 2040.

**GRANT/SOURCE:** The primary source of funding proposed for the project, typically a federal grant program. A description of codes is provided inside the back cover of this binder.

**FEDERAL, STATE, LOCAL:** The amount of funding being provided through the identified grant program (GRAN/SOURCE) and/or state and local governments.

**TOTAL AMOUNT:** The amount of funding needed to complete the proposed project in its expected year of expenditure.

## What do the codes stand for?

### PROJECT TYPE:

Most are self-explanatory, some that are not include:

- **Roadway Reconstruction:** Improvements to an existing roadway generally limited to the existing public right-of-way and not including additional vehicular lanes. The purpose is typically to improve safety or bring the roadway to desired design standards.
- **Roadway Multi-Modal:** Improvements to an existing roadway that will add or improve accommodations for pedestrians, bicyclists, or transit users.
- **Roadway Safety:** Minor improvements that enhance traveler safety, typically in the form of street lighting, signage, striping, or intersection improvements.
- **Grouping or Competitive Program:** Funding reserved for a specific purpose to be awarded to lower cost projects over the life of the plan, sometimes through competitions.

### GRANT PROGRAM:

These abbreviations generally refer to federal grant programs and include:

- **CMAQ:** Federal Congestion Mitigation and Air Quality Improvement Program
- **FTA-5307 through 5339:** Federal Transit Administration Formula Grant Programs
- **HPP\*\*:** Federal High Priority Program (aka, Congressional Earmark)
- **HSIP:** Federal Highway Safety Improvement Program

- **ITS\*\***: Federal Intelligent Transportation Systems Program
- **LOCAL**: Local funding
- **NHPP**: Federal National Highway Performance Program
- **STATE, S-LIC**: State transportation funding (STATE), state funding provided through TDOT's Local Interstate Connector (LIC) Program
- **STP**: Federal Surface Transportation Program to TDOT
- **U-STP, M-STP, L-STP, O-STP**: Federal Surface Transportation Program distributed specifically to the MPO region
- **U-TA, S-TA**: Federal Transportation Alternatives Program distributed to TDOT (S-TA) or specifically to the MPO region (U-TA)

\*\* Discontinued grant program with carryover funds from previous Congressional authorizations.

**Nashville Area MPO - 2040 Regional Transportation Plan  
Cost-Feasible Project List, 2016 to 2040**
