The Nashville Area MPO does not discriminate on the basis of age, race, sex, color, national origin, religion or disability. ADA and Title VI inquiries should be forwarded to Michelle Lacewell, Nashville Area MPO, 800 Second Avenue South, PO Box 196300, Nashville, TN 37219, (615) 862-7204

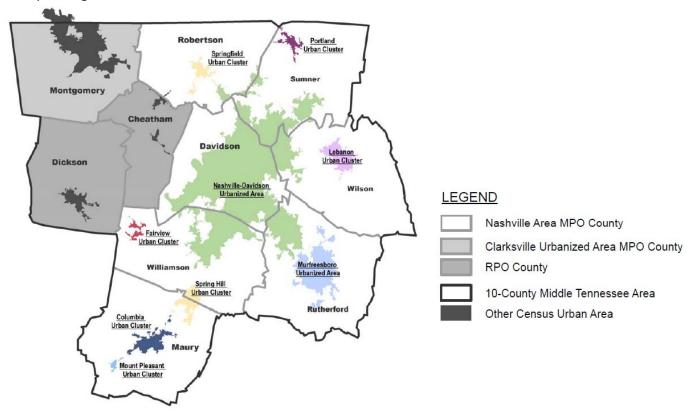

INTRODUCTION

The Nashville Area Metropolitan Planning Organization (MPO) is the federally-designated agency responsible for transportation planning in Davidson, Rutherford, Sumner, Williamson and Wilson counties and portions of Maury County and Robertson County¹.

MPOs across the country are charged with providing a continuing, comprehensive and cooperative transportation planning process for expenditure of state and federal funds within their planning areas. MPO members include all eligible local governments, the state department of transportation (DOT), and other transportation-related agencies such as transit authorities and airports. Through the MPO, those members receive and program federal funds for various transportation projects and programs.

The Nashville Area MPO functions under a committee structure comprised of an Executive Board and a Technical Coordinating Committee (TCC). The Executive Board consists of elected officials representing Davidson, Rutherford, Sumner, Wilson and Williamson counties, as well as cities in those counties with a population of over 5,000. Additional board members include the Governor of Tennessee and an elected official from the Greater Nashville Regional Council. The Board provides policy direction and a forum for transportation and air quality decisions.

The TCC consists of professional planners and engineers from local governments and other transportation related agencies. The basic responsibilities of the TCC include directing staff in the development of plans and documents such as the Long Range Transportation Plan. They provide recommendations to the Executive Board. Working groups and ad hoc groups are also created and appointed, as need dictates. The map below illustrates the MPO planning area.

¹ The MPO planning area expanded in June 2014 to include all of Maury and Robertson Counties.

ABOUT THIS REPORT

Planning requirements for MPOs are outlined in the federal transportation legislation. The Safe, Accountable, Flexible, Efficient Transportation Equity Act: A Legacy for Users (SAFETEA-LU) signed into law on August 10, 2005 required the MPOs to publish an annual listing of projects for which federal funds have been obligated in the preceding year as a record of project delivery and a progress report for public information and disclosure. SAFETEA-LU stated:

"In metropolitan planning areas, on an annual basis, no later than 90 calendar days following the end of the program year, the State, public transportation operator(s), and the MPO shall cooperatively develop a listing of projects (including investments in pedestrian walkways and bicycle transportation facilities) for which funds under 23 U.S.C. or 49 U.S.C. Chapter 53 were obligated in the preceding program year. The listing shall be prepared in accordance with § 450.314(a) and shall include all federally funded projects authorized or revised to increase obligations in the preceding program year, and shall at a minimum include the TIP information under § 450.324(e)(1) and (4) and identify, for each project, the amount of Federal funds requested in the TIP, the Federal funding that was obligated during the preceding year, and the Federal funding remaining and available for subsequent years. The listing shall be published or otherwise made available in accordance with the MPO's public participation criteria for the TIP."

The passage of the Moving Ahead for Progress in the 21st Century (MAP-21) signed into law by President Obama on July 6, 2012 superseded SAFETEA-LU but retained this provision for the annual listing of projects. In addressing such requirements, this report lists all transportation projects in the Nashville Area MPO's region that were obligated during Fiscal Year 2014 (October 1, 2013 - September 30, 2014).

The Federal Highway Administration (FHWA) defines obligation as the federal government's legal commitment to pay or reimburse the States or other entities for the Federal share of a project's eligible costs. An obligated project is one that has been authorized by the federal government and funds have been obligated or approved for reimbursement. For Federal Transit Administration (FTA) projects, obligation occurs when the FTA grant is awarded. For FHWA projects, an obligation takes place when a project agreement is executed and the State/grantee requests that the funds be obligated.³

The projects listed in this report have been developed in accordance with FHWA/FTA Final Rule on statewide and metropolitan transportation planning and programming and congestion management processes systems. The report outlines information in a user friendly and accessible format. It is the primary responsibility of the MPO to prepare the list, and it is the MPO Transportation Improvement Program (TIP) that serves as a basis for the information. However, the MPO TIP identifies projects within the fiscal year that project implementation is anticipated rather than when the project received federal authorization. Therefore, the obligated list of projects must be developed through a

² Title 23 U.S.C. 134(j)(7)(B), 23 U.S.C. 135(g)(4)(B), 49 U.S.C. 5303(j)(7)(B), and 49 U.S.C. 5304(g)(4)(B)

³ FHWA/FTA Final Rule on statewide and metropolitan transportation planning and programming and congestion management processes – Feb., 2007

cooperative effort with state and public transportation operators responsible for tracking project authorizations and obligations.

The MPO TIP lists transportation projects over a five year period that will be funded, at least in part, with funds from the FHWA and FTA. The TIP is the mechanism by which projects in the 2035 Regional Transportation Plan (RTP) get built. The TIP provides the opportunity to select projects to implement the transportation planning goals expressed in the region's adopted RTP. In order for a project to be included in the TIP, it must be in the RTP list of cost-feasible projects. The TIP serves as a four or five-year financially feasible program of transportation improvements with dollars identified for each phase and year of work.

TIP projects are consistent with federal transportation regulations and accordingly, all TIP projects become part of the Tennessee Department of Transportation's (TDOT) State Transportation Improvement Program (STIP). These projects are financially constrained and implementable for each year. The current Nashville Area MPO TIP was adopted by the MPO's Executive Board in December 2013 and covers Fiscal Years 2014-2017. Since the TIP was adopted after the beginning of FY 2014 this report may include projects that were part of the FY 2011-2015 TIP. The TIP is amended periodically to include any projects approved by the Executive Board since its original date of adoption.

The content of the annual listing of projects is consistent with the project listing in the MPO's TIP. This includes project name and identification numbers, project location, and project description. Fund obligations are a measure of the progress being made on a project. As such, the Annual Listing of Federally Obligated Projects report is prepared after the end of the federal fiscal year to tell what actually happened with TIP federal project funding during the previous fiscal year.

Projects for which funds have been obligated are not necessarily initiated or completed in the program year, and the amount of the obligation will not necessarily equal the total cost of the project. It is possible that obligated funds exceed the amount estimated in the TIP. It is also possible that unused funds may be credited back when not needed at the completion of a project phase resulting in a negative obligation or de-obligation. Amounts for such cases are shown in red and in parenthesis on the project list. Figure 1 below summarizes the obligation process.

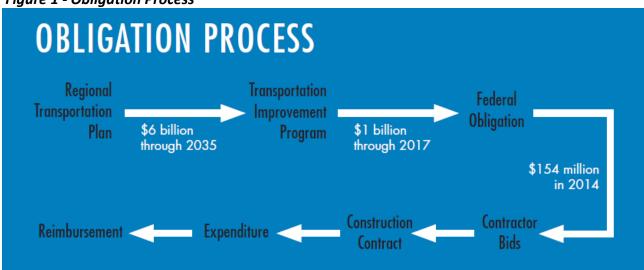

Figure 1 - Obligation Process

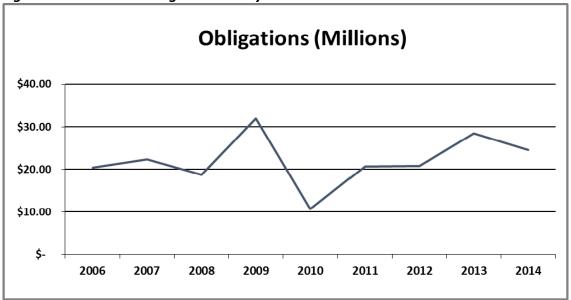

OBLIGATION HISTORY

The Nashville Area MPO has produced obligations reports for every fiscal since the introduction of the SAFETEA-LU federal transportation bill. Figures 2 and 3 illustrate the obligations history of Federal Highway Administration and Federal Transit Administration funds from fiscal year 2006 through fiscal year 2014. In all, nearly \$154 million in federal transportation grants were obligated on projects in the Nashville area during fiscal year 2014, including more than \$129 million from FHWA grants and \$24 million from FTA grants.

Obligations (Millions) \$180.00 \$160.00 \$140.00 \$120.00 \$100.00 \$80.00 \$60.00 \$40.00 \$20.00 \$-2006 2007 2008 2009 2010 2011 2012 2013 2014

Figure 2 – FHWA Funds Obligation History

SUMMARY OF FISCAL YEAR OBLIGATIONS

Obligations by Grant Program Administration

While the MPO takes the lead in selecting projects for federal funding by developing the regional plan and Transportation Improvement Program, the Tennessee Department of Transportation (TDOT) and the MPO share responsibility for awarding funds to projects based on the nature of the grant programs as defined by federal laws and regulations. Certain grant funds are administered on a statewide basis, while other grants funds are suballocated directly to the MPO area.

Of the approximately \$154 million in federal funds obligated in the MPO planning area during fiscal year 2014, 77 percent (\$119 million) were awarded from statewide funding sources administered by TDOT and 22 percent (nearly \$34 million) were awarded by grants funds suballocated to the MPO area. Less than 1 percent, or approximately \$900,000, was authorized by the U.S. Congress in the form of earmarks, or by the U.S. Secretary of Transportation in the form of competitive, discretionary grants.

Obligations by Grant Program Area

There are many different categories of grants that are directed at a wide variety of transportation projects. MAP-21 provides flexibility for the use of federal transportation funds at the state and local levels. Once used primarily for highway improvements on state and federal roadways, some of these funds can now be used for a multitude of transportation related activities. Certain funds can now be used for projects such as roadway aesthetics, pedestrian and bicycle facilities, environmental impact mitigation, preservation of historic transportation facilities, transit facilities, and right-of-way corridor preservation.

Projects located on the National Highway System (NHS) and U.S. Interstate System are primarily funded through the FHWA National Highway Performance Program (NHPP), which provided for more than \$90 million in funding and accounted for more than 58 percent of the total federal funding obligated in 2014. The NHPP grant program provides support for the condition and performance of the NHS and Interstate System including maintenance and upgrades to existing highways and the construction of new facilities.

Transit-related grant programs from the Federal Transit Administration and FHWA's Surface Transportation Program (STP) each accounted about 16 percent of the total obligated funding, or approximately \$24 million apiece. Transit funds are apportioned primarily through the Federal Transit Administration's (FTA) 5307 formula and discretionary grants and include capital and operating activities.

Eligible activities under STP funding include work on new or existing roadways (federal functional classification of "major collector" or higher), bridges, public transit capital investments, and transportation planning among others.

Figure 5 on the following page presents obligations by grant program area. For a complete list and a description of federal grant programs authorized by MAP-21, visit http://www.fhwa.dot.gov/federalaid/projects.cfm and http://www.fta.dot.gov/grants.html.

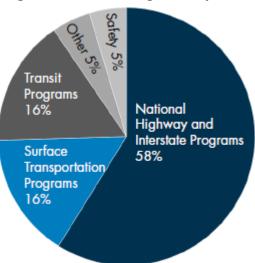

Figure 5 - FY 2014 Obligations by Grant Program Area

Obligations by System Type

The transportation network is comprised of different facilities that are part of a particular type of system. Those facilities may include interstate highways, state highways, county roads, municipal (local) roads, railways, transit ways, airports, and bike and pedestrian ways. The type of facility and system is one of the main factors that determine a project's eligibility for a specific funding source. For the purpose of this report the projects have been grouped according to the system type categories shown in Figure 6, indicating the percentage breakdown for each.

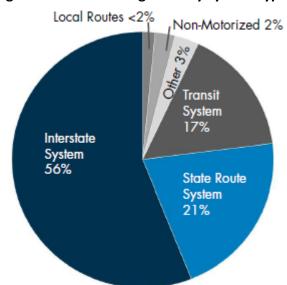

Figure 6 – FY 2014 Obligations by System Type

LIST OF OBLIGATED PROJECTS

Table 1 provides a list of all the projects with federal funding obligated in fiscal year 2014. Projects are listed by county and broken down by project categories and funding type. Each project contains information regarding its termini, type, funding type, amount of federal funds obligated, and the date the obligation took place.

Detailed descriptions for each project are included in the FY 2014-2017 TIP, which is available for downloading at: http://www.nashvillempo.org/plans programs/tip/.

The FY 2014-2017 TIP also is available interactively at: http://Tip.NashvilleMPO.org.
